

JumpKit

CLIENT PRODUCTIVITY BRIEF

Your One-Click Link Launcher for Windows & Mac

JumpKit displays your navigation links in one place — web links, local directories, shared resources — organized in categories and launched in a single click. No more clicking through folders. No more lost tabs. No more bookmarks. Just jump. Save time, save money, and track the savings automatically. Available for single users and shareable among teams.

THE PROBLEM

Bookmarks Don't Cut It

-  **They get disorganized**
Scattered bookmarks and shortcuts drift out of sync.
-  **Can't launch directories**
No way to open local folders or shared drives.
-  **Can't be shared with teammates**
No easy way to pass resources to your team.
-  **Hard to search or filter**
Finding a link means scrolling and hunting.
-  **No usage stats or notes**
No visibility into what actually saves time.

THE SOLUTION

Meet JumpKit — Your Launchpad

-  **Organized by categories**
Clean columns by department, client, or workflow.
-  **Launch directories in one click**
Open links, folders, and shared drives instantly.
-  **Shared instantly across your team**
Team collections anyone can use — no tribal knowledge.
-  **Instant search and filter**
Type-and-go search across every jump.
-  **ROI tracking and notes**
Automatically track the time and money you save.

Recommended starter rollout

1

Pick resource sets

Identify the top links, folders, portals, and drives users open repeatedly.

2

Create starter columns

Group by department, client, project, workflow, or onboarding role.

3

Share and improve

Roll out, track launches, and adjust what saves the most time.

JumpKit Free

START HERE

\$0
